1812 PC PROGRAMMABLE

TELEPHONE INTERCOM SYSTEM

5 features

- Unique communication and access control system that allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate
- System connects directly to the homeowners existing telephone line. No additional monthly expenses for a separate telephone line for the access system
- Calls from the access system are identified with a double ring while regular calls use the standard single long ring. Homeowners know instantly if a call is coming from their door or gate
- Homeowners grant their guest access by pressing 9 on their telephone, or they can deny access by simply hanging up
- Built-in call waiting feature assures that incoming calls or guest calls are not missed
- Windows compatible auto-programming software allows homeowners to program the system from their PC

THE MODEL 1812 telephone intercom system is a unique communication and access control device that provides homeowners with two-way voice communication, and control of a door or gate through their existing telephone. Visitors are easily identified by voice communication and can be granted or denied access directly from any telephone in the home. The windows compatible auto-programming software and the many advanced features on the 1812 allow the homeowner complete control of their access system.

Intercom and Camera

In addition to voice communication provided by the 1812, the CCTV camera option provides visual ID as well. Homeowners can see and talk to their guest for positive ID before granting access.

*Requires purchase of additional CCTV equipment

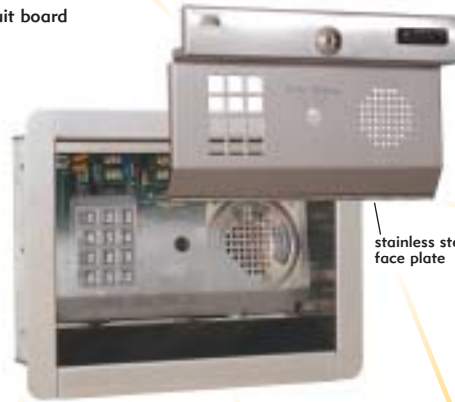

circuit board
advanced microprocessor controlled circuit board

camera
